# LeonLink Team Check-in Report

***October 17, 2026, 5:50 PM Eastern Time***

## Gotchu (VP)

Running tonight's Joustline Chapter 1 combined build: once Canon's dialogue (8:30 PM ET) and Picket's two-finger controls (9:00 PM ET) are in, I merge them, cross-check with Picket, deploy to joustline-chapter1.vercel.app and hand it to Play. Defaults unless Leon says otherwise: rival knight "John Doe", a tie counts as a loss. Since the last check-in I added Joe to ROLES.md, took Stonewall off all tasks (Swiss Hype advising moved to Picket, Practical Goals drafting to Canon), and posted the Directive that the team routes everything through me instead of messaging Leon. Still waiting on the for-the-major-general repo link (testing due Oct 31). Nothing late.

## Picket (Reviewer)

Acknowledged the 5 PM Directives at HQ. Joustline joust controls (two-finger touch, random strike circle, miss penalties) are due tonight at 9:00 PM ET and nothing is filed yet, so this is the item being watched. Also on deck: Seiko vs Citizen comparison (Oct 19), HOW TO section page (Oct 19, 12 PM), How to 3D Print and Top 5 Last-Minute Costumes (Oct 20), advising on Swiss Hype, reviewing Nomenclature, Zenzap, Pumpkin Kits/Pet Costumes and Dropshipping, and reviewing Joe's games when they arrive. Not late.

## Play (QA)

Joustline Chapter 1 phone test report due tonight at 11:00 PM ET. No build to test yet, so Play is preparing the phone test plan (two-finger input on iPhone and Android, stuck touches, mute, scroll/zoom, frame rate). Peter's Crystal Types and Ceramic Bezels drafts just landed and are ready for Play's check (due Oct 18, 6 PM), along with the SEO checklist. Later: Seiko vs Citizen, Budget Travel, Top 5 and HOW TO checks, plus QA on Joe's games. Not late.

## Canon (Writer)

Joustline Chapter 1 script pass is filed; final dialogue due 8:30 PM ET and on track. Next: pinned Watch Nomenclature glossary (Oct 18, 12 PM), What's the Hype About Swiss? (Oct 19), Zenzap: How It's Different (Oct 19), now drafting How to Set Real, Practical Goals (Oct 19, taken over from Stonewall), Pumpkin Carving Kits and Pet Costumes (Oct 20), and How to Dropship (Oct 21). Not late.

## Peter (Drafts)

Filed drafts of Watch Crystal Types and Ceramic Watch Bezels at 5:31 PM ET, well ahead of the Oct 18, 6 PM deadline; both now go to Play. Next: Best Countries to Travel on a Budget (Oct 19), Top 5 Yard Decorations and Fog Machines (Oct 20), and How to Make Your Own Gear (Oct 20). Earlier "What Is an AI" draft was about 2 hours late and is noted in the ledger; nothing currently late.

## Joe (Lead, Other Games)

Joined the team today and filed his first update at HQ at 5:38 PM ET. He builds mobile-ready games only, owns the for-the-major-general repo, and gets his next game idea from Leon as soon as he finishes one. Finished games go to Picket for review and Play for QA before going live. Questions come

to me. No deadlines yet beyond the Oct 31 testing target.

## Stonewall (Advisor)

Per Leon, Stonewall no longer receives tasks. His two assignments were reassigned (Practical Goals to Canon, Swiss Hype advising to Picket). Nothing assigned, nothing late.

## Mushroom (Morale)

Keeping spirits up through tonight's Joustline push and the article wave, and welcoming Joe to the team. No written deliverables; nothing late.
