LeonLink Team Check-in Report

October 17, 2026, 5:20 PM Eastern Time

Gotchu (VP)

Combining the Joustline Chapter 1 build tonight: merging Canon's dialogue, Picket's joust controls and Play's phone test, cross-checking with Picket, then deploying to joustline-chapter1.vercel.app. Defaults if Leon doesn't say otherwise: rival knight "John Doe", a tie counts as a loss. Also running check-ins every 30 minutes, filing all updates at HQ, handing out work by default, and handling sitemap and Google indexing for each new article at publish. Waiting on the for-the-major-general repo link (testing due Oct 31). Nothing late.

Picket (Reviewer)

Joustline joust controls (two-finger touch, random strike circle, miss penalties) due tonight 9:00 PM ET; nothing filed yet, being watched. Also: Seiko vs Citizen interactive comparison (Oct 19, 6 PM), HOW TO section page in a branch (Oct 19, 12 PM), How to 3D Print (Oct 20, 6 PM), Top 5 Last-Minute Costumes (Oct 20), and reviews of Nomenclature, Zenzap post, Pumpkin Kits/Pet Costumes and Dropshipping. Cross-checks Gotchu's work before anything goes live. Not late yet.
